Portfolio: my-portfolio-khaki-nine-w2ccf51pp9.vercel.app/#about

SUMMARY

DevOps Engineer with 3+ years of hands-on experience designing, deploying, and automating high-availability cloud platforms across AWS, Azure, and GCP. Skilled in containerization and infrastructure automation using Docker, Jenkins, Azure DevOps, GitHub Actions, and Terraform, with strong expertise in CI/CD engineering. Experienced in managing multi-environment deployments for containerized, React Native, and .NET applications, improving operational efficiency and release reliability. Delivered measurable results, including a 40% reduction in deployment lead time, automated infrastructure provisioning that cut environment setup from days to hours, and consistent 99.9% uptime across production workloads. Proficient in cloud migrations, GKE Autopilot, Azure App Services, and IIS management, with a strong focus on end-to-end automation, secure access governance, and scalable architecture.

CORE SKILLS

Cloud Platforms: AWS (EC2, S3, IAM, VPC, Lambda, ECS, EKS, RDS, Route53, ALB, API Gateway, CloudWatch, ECR), Azure (VM, Blob Storage, VNet, Azure AD, AKS, App Service, SQL DB, Load Balancer, App Gateway, Monitor, Azure DevOps, ACR), GCP (Compute Engine, GCS, IAM, VPC, Cloud Functions, GKE, Cloud SQL, Cloud Build, GCR)

CI/CD & Version Control: Jenkins, GitHub Actions, Azure DevOps, GitLab CI, Git, GitHub, Azure Repos, YAML Pipelines

Containers & Orchestration: Docker, Docker Compose, Kubernetes, GKE Autopilot

Infrastructure as Code: Terraform (Modules, State Management, Cloud Infrastructure Provisioning)

Automation & Scripting: Bash, Shell Scripting, Linux Administration, Cron Automation, Deployment & Config Automation

Monitoring & Logging: Prometheus, Grafana, CloudWatch, Azure Monitor, Application Insights, Alerting, Health Checks

Databases: PostgreSQL, MongoDB, MongoDB Atlas

Security & Identity: Azure AD, Microsoft 365, IAM, Key Vault, SSL/TLS, Certificates, Least-Privilege Access Governance

WORK EXPERIENCE

DevOps Engineer, Sequel Technologies

April 2025 - Present

Rawalpindi, Islamabad, Pakistan

- Own CI/CD pipelines in Azure DevOps for .NET, React Native, Node.js, Python, and Java services, reducing deployment lead time by approximately 40% through automated builds, tests, and multi-environment release strategies.
- Engineer and maintain hosting infrastructure on Windows IIS and Azure App Services, implementing health checks and rollback policies that reduced production incidents by 30%.
- Diagnose and resolve deployment and runtime issues, including web.config misconfigurations, file permission errors, application pool failures, and HTTP errors (500, 403, 404).
- Design and manage end-to-end deployment strategy for multi-tier .NET, React Native, Node.js, Python, and Java applications across QA, Pre-Prod, and Production environments.
- Integrate Azure Blob Storage for document handling and retrieval, improving storage performance and reliability across all environments.
- Strengthen access governance by implementing least-privilege access in Microsoft 365 and Azure AD, cutting manual onboarding time by 50%.
- Administer Azure Repos and GitLab branching policies, enforcing policy-driven version control to improve development workflow efficiency.
- Collaborate with development and QA teams to resolve pipeline failures, reducing environment-related blockers by 25% and accelerating release cycles.
- Manage user identity and access governance within Microsoft 365 and Azure AD, specializing in secure creation and configuration of role-based permissions.

DevOps Engineer, Anemoia.dev

July 2023 - April 2025

Islamabad, Pakistan

- Built CI/CD pipelines using Jenkins, GitHub Actions, and Azure DevOps, boosting deployment reliability by 35% and reducing manual intervention.
- Implemented Docker-based deployments across cloud and on-prem environments, ensuring consistent, reproducible application delivery.
- Developed Bash/Shell automation scripts that eliminated 80% of repetitive server tasks, accelerating operational workflows.
- Administered Linux servers, troubleshooting system issues and optimizing performance across cloud and on-prem environments.
- Managed version control with Git and GitHub, including repository management, branching strategies, and code reviews.
- Automated application deployments, system updates, and infrastructure provisioning, reducing manual errors and improving deployment speed.
- Managed Terraform-based infrastructure provisioning, resulting in 70% faster environment setup across multiple projects.
- Collaborated closely with developers to streamline deployment pipelines, optimizing release speed and reducing deployment failures.

PROJECTS

Stable Admin & Stable Business App Deployment	January 2024 - December 2024
Deployed and maintained two production-grade applications on AWS EC2 instances. Managed complete CI/CD pipelines and automated database backups using shell scripts and cron jobs.	
Technologies: AWS EC2, Docker Compose, Shell scripts, Cron jobs	
TechMetaScore App Deployment	January 2024 - December 2024
Led the deployment and maintenance of the TechMetaScore application on AWS. Designed and implemented a custom MongoDB database and automated backup processes.	
Technologies: AWS EC2, Docker Compose, MongoDB, Shell scripting, Cron jobs	
Advanced Car Wash App Deployment and PostgreSQL Migration	January 2024 - December 2024
Successfully migrated the application and PostgreSQL database from Heroku to Azure VM. Deployed and managed applications using Docker Compose with automated backups.	
Technologies: Azure VM, PostgreSQL, Docker Compose, Shell scripts, Cron jobs	
Bondii - Cloud Infrastructure on GCP	January 2024 - January 2025
Managed full cloud infrastructure on GCP using Terraform. Set up VPC, subnets, and GCS buckets, and integrated MongoDB Atlas. Deployed workloads on GKE Autopilot and Cloud Run.	
Technologies: GCP, Terraform, GCS, MongoDB Atlas, GCR, GKE Autopilot, Cloud Run, Azure DevOps	
PracticeEHR	January 2025 - Present
Spearheaded end-to-end deployment and management across QA, Pre-Prod, and Production. Maintained CI/CD pipelines for .NET backend and React Native APIs. Configured hosting on IIS and Azure App Services.	
Technologies: Azure DevOps, Windows IIS, Azure App Services, Azure Blob Storage, Azure Repos, GitLab, Azure AD	

EDUCATION

Bachelor of Science in Computer Science
Institute of Management Sciences, Peshawar, Pakistan September 2019 - July 2023

CERTIFICATIONS

AWS Certified Solutions Architect - Associate	Issued 08/2026 - Expires 08/2029
Amazon Web Services Training and Certification Credential ID: ac76678e-1d55-40ee-903e-fc51b06693b6
