

ISHAQ AHMAD KHAN

DEVOPS ENGINEER

ahmadishaq41455@gmail.com | +92 03450444256 | Golden jubilee housing society street 5B house No F56 57 Room No 13, Islamabad, Pakistan | Ishaq Ahmad | ishaquad41455

Summary

Experienced DevOps Engineer with over 3+ years of expertise in designing and implementing high-performance delivery pipelines on Azure. Proficient in automating complex workflows using Jenkins, GitHub Actions, and Azure DevOps for .NET, Java, and Node.js applications. Demonstrated success in optimizing infrastructure via Terraform and managing containerized deployments on AKS. Proven ability to reduce deployment lead times by 40% while maintaining 99.9% uptime and implementing secure DevSecOps practices through Azure AD.

Work Experience

Sequel Technologies

04/2025 - Present

DevOps Engineer

Rawalpindi, Islamabad, Pakistan

- Architected and owned CI/CD pipelines in Azure DevOps for .NET, Java, and Node.js services, achieving a 40% reduction in deployment lead time through advanced automation and multi-environment release strategies.
- Engineered scalable hosting infrastructure using Azure App Services and IIS, implementing robust health checks and automated rollback policies that decreased production incidents by 30%.
- Diagnosed and resolved critical deployment and runtime issues within Azure environments, ensuring high-availability and reliability for production workloads.
- Designed and managed end-to-end deployment strategies for multi-tier applications across Azure QA, Pre-Prod, and Production environments.
- Integrated Azure Blob Storage into deployment workflows for optimized document handling, improving storage performance and reliability across all environments.
- Strengthened DevSecOps posture by implementing least-privilege access governance in Azure AD, reducing manual onboarding time by 50%.
- Optimized development workflows by administering Azure Repos and enforcing policy-driven version control to ensure highperformance delivery.
- Collaborated with cross-functional teams to resolve pipeline blockers, resulting in a 25% reduction in environment-related issues and accelerated release cycles.
- Leveraged Jenkins and GitHub Actions to design and implement high-performance delivery pipelines, automating the full build and deployment lifecycle.
- Managed secure identity and access governance within Microsoft 365 and Azure Active Directory, ensuring role-based permissions and compliance.

Anemoia.dev

07/2023 - 04/2025

DevOps Engineer

Islamabad, Pakistan

- Built CI/CD pipelines using Jenkins, GitHub Actions, and Azure DevOps, boosting deployment reliability by 35% and reducing manual intervention.
- Implemented Docker-based deployments across cloud and on-prem environments, ensuring consistent, reproducible application delivery.
- Developed Bash/Shell automation scripts that eliminated 80% of repetitive server tasks, accelerating operational workflows.
- Extensive experience with Jenkins, Github Actions and Azure DevOps for setting up CI/CD pipelines, automating the entire build, test, and deployment processes to ensure continuous integration and delivery.
- Strong command of Linux for managing servers, troubleshooting system issues, and optimizing performance in cloud and on-prem environments.
- Experience in version control with Git and GitHub, managing repositories, handling branching strategies, and collaborating with teams for code reviews and project tracking.
- Developed automation scripts using Bash and Shell scripting to streamline processes, automate routine tasks, and enhance operational efficiency.
- Automated application deployments, system updates, and infrastructure provisioning, reducing manual errors and improving the speed of deployments.
- Designed and implemented automated workflows to improve development lifecycles, ensuring rapid and reliable application delivery.
- Worked closely with developers to automate application deployment pipelines, optimizing the speed of releases and reducing deployment failures.
- Deployed applications to cloud and on-premises environments using Docker, enabling scalable and consistent application environments.
- Managed Terraform-based infrastructure provisioning, resulting in 70% faster environment setup across multiple projects.

Education

Institute of Management Sciences Peshawar Bachelor In Computer Sciences, Computer Sciences

09/2019 - 07/2023

Peshawar, Pakistan

Projects

Stable Admin & Stable Business App Deployment

01/2024 - 12/2024

Deployed and maintained two production-grade applications on AWS EC2 instances. Managed complete CI/CD pipelines and automated database backups using shell scripts and cron jobs.

Technologies: AWS EC2, Docker Compose, Shell scripts, Cron jobs

Techmetascore App Deployment

01/2024 - 12/2024

Led the deployment and maintenance of the TechMetaScore application on AWS. Designed and implemented a custom MongoDB database and automated backup processes.

Technologies: AWS EC2, Docker Compose, MongoDB, Shell scripting, Cron jobs

Advanced Car Wash App Deployment and Migration of Postgres

01/2024 - 12/2024

Successfully migrated the application and PostgreSQL database from Heroku to Azure VM. Deployed and managed applications using Docker Compose and automated backups.

Technologies: Azure VM, PostgreSQL, Docker Compose, Shell scripts, Cron jobs

Bondii

01/2024 - 01/2025

Managed full cloud infrastructure on GCP using Terraform. Set up VPC, subnets, GCS buckets, and integrated MongoDB Atlas.

Deployed workloads on GKE Autopilot and Cloud Run.

Technologies: GCP, Terraform, GCS, MongoDB Atlas, GCR, GKE Autopilot, Cloud Run, Azure DevOps

PracticeEHR

01/2025 - Present

Spearheaded end-to-end deployment and management across QA, Pre-Prod, and Production. Maintained CI/CD pipelines for .NET backend and React Native APIs. Configured hosting on IIS and Azure App Services.

Technologies: Azure DevOps, Windows IIS, Azure App Services, Azure Blob Storage, Azure Repos, GitLab, Azure AD

Skills

- **AWS:** EC2, S3, IAM, VPC, Lambda, ECS, EKS, EB, EBS, RDS, Route53, ALB, API GW, CW, CI/CD, ECR
- **Azure:** VM, Blob, VNet, AAD, AKS, App Service, SQL DB, LB, App GW, API, Monitor, ADO, ACR
- **GCP:** Compute, GCS, IAM, VPC, Functions, GKE, Cloud SQL, LB, API GW, Monitoring, Cloud Build, GCR
- **Containerization & Orchestration:** Docker, Docker Compose, Kubernetes (GKE Autopilot)
- **Infrastructure as Code:** Terraform (Modules, State Mgmt, Cloud Infra Provisioning)
- **Automation & Scripting:** Bash, Shell scripting, Linux administration, Cron automation, Deployment scripting, Config automation
- **Monitoring & Logging:** Prometheus, Grafana, CloudWatch, Azure Monitor, Log management, Alerting, Health checks
- **Version Control & CI/CD:** Git, GitHub, Azure Repos, GitLab, Azure DevOps, Jenkins, GitHub Actions, GitLab CI, Pipeline design, YAML pipelines
- **Databases:** PostgreSQL (Azure VM & Docker), MongoDB, MongoDB Atlas
- **Others:** Automated testing, Release automation, IAM, Azure AD, Microsoft 365, SSL/TLS, Certificates
- **Azure Tools:** Key Vault
- **Monitoring & Analytics:** Application Insights
- **Leadership & Management:** Mentoring
